30%+

Cloud cost cut

50K+

Concurrent users

### PROFESSIONAL SUMMARY

Technical Lead Architect with **19+ years** architecting, leading and delivering cloud-native transformation across distributed, high-scale systems. Currently owning platform-wide architecture for a multi-channel **Customer Communications Management (CCM)** platform — resilient design, event-driven architectures (Kafka Streams, Spring Kafka), Zero-Trust security, and a production **Agentic AI platform (RAG, MCP)**. A strategic partner to business and technology leadership, translating complex requirements into scalable, production-grade platforms built on Domain-Driven Design, while building and mentoring high-performing engineering teams.

### CORE ARCHITECTURE & TECHNICAL SKILLS

|                         |                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------|
| Architecture            | Solution & Enterprise Architecture, Microservices, DDD, Event-Driven Architecture, Scalability, Zero-Trust Security |
| Messaging & Streaming   | Kafka Streams, Spring Kafka, Event Sourcing, Pub-Sub, RabbitMQ                                                      |
| Backend                 | Java 17/21, Spring Boot 3, Spring WebFlux/Reactor, Spring Cloud, Python, FastAPI, REST, gRPC                        |
| Data & Cloud            | MongoDB, Redis, AWS (EKS, Lambda), Kubernetes, Terraform                                                            |
| DevSecOps               | AI-integrated CI/CD, GitLab CI, Nginx, Snyk, Prometheus, Grafana                                                    |
| AI & Agentic            | RAG (Retrieval-Augmented Generation), Agentic AI Workflows, MCP Server Integration                                  |
| Governance & Leadership | Architecture Review & Governance, Release Governance, Roadmap Ownership, Team Mentoring                             |

## EXPERIENCE

---

### Technical Lead Architect

FCI CCM · Noida · 2024 — Present

#### FCI CCM

- ▶ Lead architect for the VARTA CCM multi-channel platform on Spring Boot, MongoDB, Kafka & Kubernetes — chairing architecture governance and directing cross-functional teams.
- ▶ Delivered an **8x throughput** gain on a PDF-generation service via a fully reactive pipeline and a tuned Spring WebClient connection pool (600 connections, custom eviction/retry), confirmed in UAT.
- ▶ Re-architected the Kafka consumer pipeline with @RetryableTopic, exponential backoff and a Dead Letter Topic persisted to MongoDB with a replay/archive API.
- ▶ Designed a Zero-Trust architecture (Istio, OAuth2/JWT + mTLS, PII encryption, Kafka SSL/SASL, Vault) aligned to GDPR/DPDP/ISO 27001.
- ▶ Architected a production RAG + Agentic AI platform — Redis vector search, ReAct reasoning loop, and an MCP server with OpenAI integration.

### Lead Software Development

Entain India · Hyderabad · 2021 — 2024

#### Entain India

- ▶ Architected a real-time gaming ecosystem on EDA & Spring Kafka sustaining **50K+ concurrent users** with zero critical incidents.
- ▶ Built event-based fraud detection processing **10K+ events/sec**; multi-region deployment on EKS + Terraform.
- ▶ Applied DDD to decompose cross-domain microservices, reducing inter-service complexity and accelerating delivery.

### Principal Consultant

Genpact · Noida · 2018 — 2021

#### Genpact

- ▶ Drove enterprise architectural modernisation for financial-services clients on AWS, cutting infra cost **30%+** via auto-scaling microservices.
- ▶ Built AI-integrated CI/CD pipelines and event-driven capital-markets workflows; high-performance discovery with Apache Solr.

### Technical Lead

DXC Technology · Noida · 2017 — 2018

#### DXC Technology

- ▶ Architected Spring microservices for insurance risk assessment; custom Spring Boot starters for logging, security and exception handling.
- ▶ Led migration of on-prem Java apps to Docker/OpenShift, laying the foundation for cloud-native operations.

### Technical Lead

Netlink / Xeeva · Noida · 2013 — 2016

#### Netlink / Xeeva, Inc.

- ▶ Led technical strategy for B2B e-procurement & multi-tenant SaaS — containerisation, multi-tenant data isolation, centralised config with Spring Cloud.

## Senior Software Engineer

iYogi · Gurgaon · 2012 – 2013

### iYogi Inc.

- Streamlined payment gateways with 3D-Secure & fraud prevention; refactored SOAP integrations to REST, improving mobile performance.

## Senior Software Engineer

Trilasoft · Noida · 2010 – 2012

### Trilasoft Solution

- Built a logistics platform — real-time consignment tracking, barcode warehouse management, customer portal with L2 caching.

## Java Developer

Iipseity Group · Noida · 2006 – 2010

### Iipseity Group

- Developed secure smart-card identity systems and PKI authentication; automated audit trails enabling ISO 27001 certification.

## EDUCATION

---

### B.Tech — Computer Science & Engineering

2006

UP Technical University, India
