

Pawon Kumar

Technical Lead / Architect

 Noida, India  pkatiyar387@gmail.com  +91 98715 60256  in/pkatiyar387

PROFESSIONAL SUMMARY

Technical Lead / Architect with **19+ years** architecting, leading and delivering cloud-native transformation across distributed, high-scale systems. Currently owning platform-wide architecture for a multi-channel Customer Communications Management (CCM) platform — resilient design, event-driven architectures (Kafka Streams, Spring Kafka), Zero-Trust security, and a production Agentic AI platform (RAG, MCP). A strategic partner to business and technology leadership, translating complex requirements into scalable, production-grade platforms built on Domain-Driven Design, while building and mentoring high-performing engineering teams.

CORE COMPETENCIES

ARCHITECTURE

- Solution & Enterprise
- Microservices
- DDD
- Event-Driven
- Scalability

MESSAGING

- Kafka Streams
- Spring Kafka
- Event Sourcing
- RabbitMQ

BACKEND

- Java 17/21
- Spring Boot 3
- WebFlux
- Python
- FastAPI
- gRPC

DATA & CLOUD

- MongoDB
- Redis
- AWS EKS
- Kubernetes
- Terraform

DEVSECOPS

- GitLab CI
- Snyk
- Prometheus
- Grafana
- Vault

AI & AGENTIC

- RAG
- Agentic Workflows
- MCP Server

LEADERSHIP

- Architecture Governance
- Roadmap Ownership
- Mentoring

EXPERIENCE

Technical Lead / Architect

FCI CCM · Noida

Feb 2024 — Present

- Lead architect for the VARTA CCM multi-channel platform (Spring Boot, MongoDB, Kafka, Kubernetes); chair architecture governance and direct cross-functional teams.
- Delivered an **8× throughput** gain on a PDF-generation service via a fully reactive pipeline and a tuned Spring WebClient connection pool — confirmed in UAT.
- Re-architected the Kafka consumer pipeline with @RetryableTopic, exponential backoff and a Dead Letter Topic persisted to MongoDB with a replay/archive API.
- Designed a Zero-Trust architecture (Istio, OAuth2/JWT + mTLS, PII encryption, Kafka SSL/SASL, Vault) aligned to GDPR / DPDP / ISO 27001.
- Architected a production RAG + Agentic AI platform — Redis vector search, ReAct reasoning loop, MCP server with OpenAI integration.

Lead Software Development

Entain India · Hyderabad

Nov 2021 — Feb 2024

- Architected a real-time gaming ecosystem on EDA & Spring Kafka sustaining **50K+ concurrent users** with zero critical incidents.
- Built event-based fraud detection processing **10K+ events/sec**; multi-region deployment on AWS EKS with Terraform.
- Applied Domain-Driven Design to decompose cross-domain microservices, accelerating feature delivery.

Principal Consultant

Genpact · Noida

Oct 2018 — Nov 2021

- Drove enterprise architectural modernisation for financial-services clients on AWS, cutting infrastructure cost **30%+** via auto-scaling microservices.
- Built AI-integrated CI/CD pipelines and event-driven capital-markets workflows; high-performance discovery with Apache Solr.

Technical Lead

DXC Technology · Noida

Jan 2017 — Oct 2018

- Architected Spring microservices for insurance risk assessment; built custom Spring Boot starters standardising logging, security and exception handling.
- Led migration of on-premises Java applications to Docker / OpenShift.

Technical Lead

Netlink / Xeeva, Inc. · Noida

Jul 2013 — Dec 2016

- Led technical strategy for B2B e-procurement & multi-tenant SaaS — containerisation, multi-tenant data isolation, centralised config with Spring Cloud.

KEY ACHIEVEMENTS

8× throughput

Reactive PDF-generation pipeline (UAT-confirmed)

30%+ cost cut

Monolith → auto-scaling AWS microservices

10K+ events/sec

Real-time fraud detection, zero downtime

50K+ users

Event-driven ecosystem, zero critical incidents

40% faster

Deployment cycle via Kubernetes containerisation

EDUCATION

B.Tech — Computer Science & Engineering

UP Technical University, India · 2006

Senior Software Engineer

iYogi Inc. · Gurgaon

Jul 2012 — Jul 2013

- Streamlined payment gateways with 3D-Secure & fraud-prevention APIs; refactored SOAP integrations to REST, improving mobile performance.

Senior Software Engineer

Trilasoft Solution · Noida

Aug 2010 — Apr 2012

- Built a logistics platform — real-time consignment tracking, barcode warehouse management, and a customer portal with L2 caching.

Java Developer

Ipseity Group · Noida

Dec 2006 — Jul 2010

- Developed secure smart-card identity systems and PKI authentication; automated audit trails enabling ISO 27001 certification.
